PROFESSIONAL SUMMARY

BCA Data Science student with hands-on experience in Python, SQL, Pandas, and NumPy. Skilled in data cleaning, data preprocessing, exploratory data analysis, data visualization, and machine learning. Built a Stock Market Prediction project and completed Forage virtual job simulations. Seeking an entry-level AI/ML or Python Developer role to apply programming and analytical skills.

TECHNICAL SKILLS

Programming:	Python, SQL
Python Libraries:	Pandas, NumPy, Matplotlib, Scikit-learn
AI/ML & Data:	Machine Learning, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization
Tools:	Jupyter Notebook, Microsoft Excel, Power BI
Core Concepts:	Object-Oriented Programming (OOP), Data Structures

PROJECTS

Stock Market Prediction Project | Python, Machine Learning

- Developed a machine learning project in Python to predict stock price movements using historical data.
- Cleaned and preprocessed data using Pandas and NumPy, including handling missing values.
- Created visualizations to present data patterns and model results.

Data Analytics Virtual Job Simulations | Forage

- Completed virtual job simulation tasks based on real-world business and data analytics scenarios.
- Applied Python and SQL for data handling and communicated analytical findings.

CERTIFICATIONS

- Forage - Data Analytics Job Simulation Certificate
- Forage - Job Simulation Certificate
